On Keeping the Sabbath.

Some 1900 years ago in the city of Jerusa. lem there went on a discussion concerning Sabbath observance, similar to the one now in progress. A preacher was going about proclaiming ficals new to the times. He shocked conservatives with new interpretations

of Sabbath proprieties. His name was Jesus. According to the gospel of Luke, Jesus was teaching on the Sabbath day. And He beheld a woman "that had a spirit of infirmity 18 TEATS."

and said to her, woman, thou art loosed from thine infirmity. And He laid His hands upon her; and immediately she was straight and glorified God "

One Way.

One New Yorker found a way to deal with the profitor. He stopped at a stand to have his shoes shined. He was charged 15 cents. He paid, but knew that he had been over charged 5 cents. He remonstrated, but when he was not given satisfaction he blacked the profiteer's eyes. Of course that didn't get his money back, but he had the satisfaction of putting the bootblack to an expense for medical attention that will cost him more than the nickel excess that he exacted.

Worker Is Reasonable.

Nine thousand employes of the Pullman car shops have notified the management they are willing to accept a voluntary reduction of 20 per cent in wages. Wages have increased nearly 100 per cent in the Pullman shops in the last three years. The men believe that with reduced operating expenses the company will be in position to obtain more and, larger contracts and that will mean uninterrupted employment. It is further explained in the men's statement that they realize that war pay cannot remain permanent, and that as the prices of living commodities gradually are returning to normal they must expect to see their wages correspondingly reduced.

At Pullman the workers have a voice in the management of the business. There is said to be a cordial relationship existent between the workers and the officers. All the cards are placed on the table. The workers know what the profits of the concern are, and they know

Every reasoner knows that present conditions can't prevail permanently. There must be a break all along the line. But the attempt to reduce the income of the worker without first curtailing the size of his living account won't work. The worker is not fighting reasonable reduction in pay if he is shown that be will be as prosperous under the revised schedule as he is under the one in effect at
